

Modern Solutions for the Future Fight

Modern battlefields demand warfighters maintain a competitive, strategic advantage over adversaries. That means looking ahead.

Are you giving your teams what they need to succeed beyond the now?

Octo provides the right tools to overcome challenges before they become threats. Always with innovation and warfighters in mind, we have been at the forefront of applying the latest commercial technologies in support of defense and intelligence sectors. Our subject matter experts understand the importance of data management, security, and emerging technology, and how to best develop and implement user-centric solutions safely and efficiently. See how Octo is supporting warfighters through the power of cutting-edge solutions.

Common Data Fabric

Shatter Silos

Secure data brokering across the Defense Intelligence Enterprise. The Defense Intelligence Enterprise's Common Data Fabric (CDF), enabled by Octo engineering, makes data ubiquitous with policy-driven data sharing at speeds and volumes greater than ever before.

SHIFT UP™

Cross the Finish Line

Begin coding in minutes and rapidly deliver capabilities to warfighters. Move quickly and cost effectively into the modern software world with a set of tools that supports all the necessary services to create an advanced Agile DevSecOps enterprise.

Hatteras

Maintain Your Edge

Empower non-technical users to deploy and maintain ML models anywhere and deploy operational AI. Hatteras is a low cost but essential MLOps solution that enables AI at scale, even at the tactical edge. It empowers warfighters by preventing model decay and adversarial AI, automatically retraining ML models through a user interface that requires no DevOps experience.

OCTO CX

Cut Through the Noise

Enable intelligence discovery at mission speed. Used alone or as a complementary suite, Octo CX™ products collect, aggregate, sort, push, and store actionable information. Structured and unstructured data, simple and complex imagery—Octo CX gives teams what they need to know faster than ever before, even in the most austere environments.

Why Octo

We don't shy away from tough challenges. We approach each situation with a fresh perspective; we listen to our clients and provide the right solution for their individual agency needs. Our ideal clients are Federal agencies ready to take advantage of cutting edge technology to boost effectiveness across their mission objectives. Modernizing infrastructure and software drives efficiencies that reduce operating cost, enhance security, and increase focus on the user.

About Octo

Headquartered in Reston, Virginia, Octo delivers proven technology vital to intelligence, defense and national security, empowering the future of fight. Dedicated to establishing battlefield dominance, bolstering warfighter survivability, and securing the nation, we collaborate with customers to create, implement, and integrate at-scale next-generation technology and innovation.
